MANUAL INDUCTION CAP SEALING MACHINE

MODEL SIGMA FLEX LAB SCALE

Electronics Devices designs the most portable induction cap sealer - Sigma Flex. It is specifically designed for hand held cap sealing, in low production applications.

FEATURES

- **Portable**
The system is small enough to carry and seal anywhere. Easy line relocation.
- **No Water Needed**
Water less, 100% Air - cooled
- **Universal sealing head**
capable of sealing a wide range of closure diameters.
- **Digital Soft Touch Membrane Control Panel**
For easy operator interface.
- **Coax Cable**
High efficiency, low loss cable allows for extended lengths and shorter heat cycles.
- **Digital Up / Down Timer**
For accurate time recording and optimum sealing.

- **User Friendly**
No tuning, no tools. just plug it into 230 V single phase mains power supply, set the timer and seal.
- **Continuous Use**
Rugged, built to last. This machine can be used continuously for 24 hr Production.
- **Versatile**
Small in size but big on performance, Sigma Flex will seal closures from 20 to 120 mm in a single sealing head.
- **Fast, easy set-up.**

SPECIFICATIONS : Marked

Input	230V $\pm$ 10% V AC, SINGLE PHASE, 60Hz
Sealing Capacity (Avg. Output)	4 - 6 bottles / minute
Cap Size	20 - 120 mm
